

Emissions Monitoring and Combustion Control Services

- **Emissions Monitoring Systems**
- **Process Analysers**
- **Process Sensors**
- **Data Logging**
- **Tunnel Atmosphere Monitoring**
- **Systems Integration**
- **Maintenance**
- **Installation**
- **Commissioning**
- **Calibration**
- **Validation**

EMACCS

We are one of the fastest growing providers of installation and maintenance services in the country. We specialise in emissions monitoring systems as well as tunnel atmosphere monitors.

We offer a full range of services including systems integration, installation, commissioning and maintenance. Along with this, we offer emissions testing services to ISO standards to meet new quality assurance standards.

We also provide a boiler and burner spares service to keep equipment in first class condition.

Service and Maintenance

EMACCS are acknowledged specialists in servicing a wide range of emissions monitoring equipment. One of our key advantages is that we can service most CEMS equipment and are not confined, like equipment manufacturers, to our own analysers.

We offer:

- Comprehensive service and maintenance contracts
- Emergency call-out cover including 24-hour response
- Traceable service, maintenance and calibration records that exceed the requirements of OMA audits
- Fully qualified and experienced field service engineers

New and Upgraded Systems

EMACCS are experienced systems integrators with the capability to specify, design and integrate a system specific to your process needs. Our primary business area is emissions monitoring systems but we are also heavily committed in the road tunnel sector .

We offer:

- Complete system design, integration, installation, commissioning and validation
- System upgrades to meet new regulatory requirements
- Project management services for new installations

EMACCS are experienced systems integrators with the capability to specify, design and integrate a system specific to your process needs. Our primary business area is emissions monitoring systems but we are also heavily committed in the road tunnel sector .

We offer:

- Complete system design, integration, installation, commissioning and validation

Testing Services and Consultancy

In addition to our system integration and maintenance services, we also offer calibration services to ISO standards to ensure that emissions monitoring systems meet stringent accuracy requirements.

We offer:

- System calibration using validated audit gases
- Full audits for BS EN14181 (QAL2 and AST) using Standard Reference Methods
- MCERTS approved testing contractors
- Fully integrated service

Pre-testing analyser service

Validated testing

Detailed reports

Post-test analyser calibration

- Annual testing and calibration service for particulate monitors to BS EN 13284-1
- Consultancy services
 - Emissions monitoring
 - Boiler management
 - Analyser selection
 - Quality assurance of CEMS systems

Road Tunnel Atmosphere Monitoring

EMACCS are UK distributors for Tunnel Sensors Ltd and can supply and install their range of CO, NO, Visibility, and Flow sensors.

We offer:

- Service and maintenance of tunnel atmosphere monitors
- Comprehensive service contracts
- Emergency call-outs
- Sourcing and installing new systems
- Systems integration
- Data handling systems

We also work in partnership with large contractors to supply a comprehensive range of tunnel equipment including fire detection and suppression systems, CCTV systems, ventilation systems, SCADA and plc systems and electronic signs.

Boiler and Burner Spares

EMACCS carries a substantial inventory of boiler and burner spares for most types of package boiler. We can respond rapidly to your requirements and offer an expert boiler maintenance service.

Most parts are available for next day delivery.
